## Adult Personal Care Products

Adult personal care products comprise the fastest growing segment of all personal care products. Adult products have a 25% higher growth rate than skin care and fragrance products combined.

This amazing category is virtually overlooked by major marketers who do not want to compromise their conventional product lines with adult products. However, the market continues to grow.

The Water Club, the Borgata Hotel Casino & Spa's ultra-posh luxury hotel offers a package of adult personal care items called "The Passion Kit". The sex kits are the top-selling in-room item.

Telmark Packaging Corporation has made a niche in the adult personal care products industry. Our expertise is in developing, manufacturing and packaging liquids, gels, creams, ointments as well as tablets and capsules. We have chemists who research and formulate these items and will work with your developers to produce products to your custom specifications. Or, choose among our vast library of private label formulas many of which are patented and protected for use.

All our products are manufactured in FDA approved facilities under strict GMP guidelines.
