- ⤴ In-line Check Weighing

Telmark Packaging Corporation represents extensive contract manufacturing and specialty packaging for the food industry. Our expertise is in blending powder and granular products such as spices, food mixes, nutritional supplements, snack foods and other dry food products. We then package these products into a variety of form-fill-seal containers such as pouches, gusseted pouches, zip-lock pouches and bag-in-box.

We also package liquid products such as salad dressing, condiments and sauces in form-fill-seal containers. Our facilities are FDA approved and we are designated as "**Organic Certified**". The modern 120,000 sq. ft. facility has bulk rail accessibility as well as silo systems for storing large volumes of dry products.

In addition, we have the capabilities to automatically carton, shrink-wrap, assemble displays, hot-melt and other secondary packaging options.

Our quality control systems are impressive and designed to ensure that each product and package is manufactured to the highest standards. We utilize computerized combination scales and in-line check-weigh systems so that each package meets our high standards
