- Two Sided Printing

Innovative Design

- Unique Impressionable Design
- Great for mixing into bottled water
- Offers various fill weights

With today's constantly changing market, using packaging that keeps up with consumer trends is extremely important. Stick packs are a new and increasingly popular method of unit-dose delivery.

The stick pack taps into the ever expanding trend of bottled water. With its innovative shape and delivery system, it is an ideal package for water additives such as powder-drink mixes, sugars and sweeteners, nutritional supplements and more. There is a growing trend for bottle water additives. The stick pack is an ideal marriage of function and use.

The Stick pack shape is not only designed for ease of use but also offers economical benefits as well. It uses less film to accomplish its goals than other pouches. The shape also makes it easy to fit many units in a smaller folding carton or container. All of this size economy doesn't take away from the area offered for graphics. The Stick pack offers a large area for print, allowing for creative and visually striking packaging.

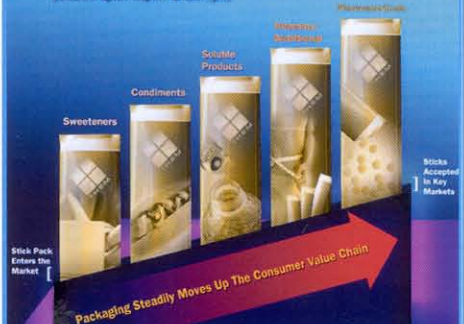

The Stick pack uses are almost endless. It offers a trendy professional look, at an affordable price. Please contact us with any questions.
