- **Easy to open (twist top)**
- **Provides pinpoint directional flow**
- **Tamper evident**
- **Economic**

Telmark Packaging Corporation is proud to introduce you to a new and innovative unit-of-use tube. The tube strips are injection-molded in sets of five tubes. They are available in a variety of clear or solid colors (we can match any PMS solid color). Tube strips have been designed to handle a wide range of liquid and semi-liquid products providing an economic, attractive and consumer-friendly packaging alternative.

Tube strips are molded from a mix of flexible low-density and medium-density polyethylene. Several stock molds are currently available in sizes to hold 1.5ml, 3ml, 5ml, 10ml. We provide economical 1-color front/back tamper-print or up to 7-color label decoration.

Telmark contract fills these packages in an FDA compliant facility with innovative filling equipment that allow up to 5 different products with separate label graphics to be filled in the strip.

We inventory tube blanks, print & label in-house, fill and secondary pack to insure minimum lead times and maximum service. Filled and decorated tubes are generally available within 2-4 weeks. And, minimum order quantities are remarkably low (10K strips of 5 tubes).

Please call us, (732) 739-9100, at your convenience to learn more about this extraordinary unit-dose package.
