

UD Dispensers

- One of the most economic single-use packages for liquids, creams, gels, pastes
- Provide excellent barrier protection (long shelf life)
- Compatible with most liquid and semi-liquid products
- Easy to open yet tamper evident
- Pinpoint directional flow from a variety of tip configurations
- Sizes ranging from 0.25ml to 90ml (3 fluid ounces)
- Film material available in clear, and white
- In-line decoration: hot foil stamping
- See your products through the clear film material
- Available in small quantities as well as high volume applications

UD Dispensers have been the workhorse of unit-of-use packaging for many different liquid and semi-liquid products. UD Dispensers provide excellent barrier protection, allow for pinpoint directional dispensing, are easy-to-open, look attractive and are extremely cost effective.

Made from .006" (6 mil) high barrier plastic, these unique containers are compatible with most liquid products and provide a shelf life greater than many similar packages. These tube hybrids are available in package sizes from 0.25ml to 30ml (1 fluid ounce) and can be filled with products whose viscosity range from water to toothpaste.

UD Dispensers, available in clear and white or plastic, can be decorated on both sides with eye-popping hot stamp imprinting. The directional flow, accomplished with an orifice-reduced seal, allows for accurate and un-messy dispensing.

UD Dispensers have always been a staple medium for sampling almost any type of liquid product. The ability to see your product through our clear saran gives samples a dimension that other packages, such as foil pouches, cannot. And, UD Dispensers are economically available in small quantities so even a limited promotion can be effectively supplemented with samples.

Whether for sampling or for single-use applications, consider the UD Dispenser the next time you require unit-of-use packaging. Please call us, (732) 739-9100, to learn more about this extraordinary unit-dose package.
